## PROFILE

Junior Full stack developer on a mission to master the depths of Full Stack Web Development. My hands-on experience as a System Developer Intern and my academic tenure has fueled my passion for crafting seamless, innovative solutions. From actively contributing to system development to effectively managing point of sale operations, I bring a blend of technical prowess, strong communication skills, and a relentless pursuit of excellence in creativity design and development. I aim to broaden my technical knowledge continuously and convey complex technical concepts effectively, striving for software excellence.

---
